

Building amplifier

WHX-x29

RoHS

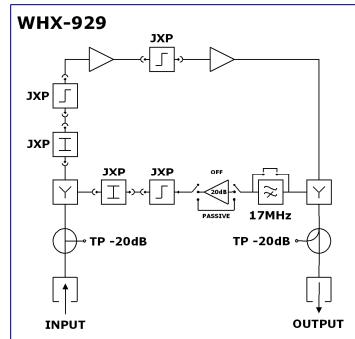

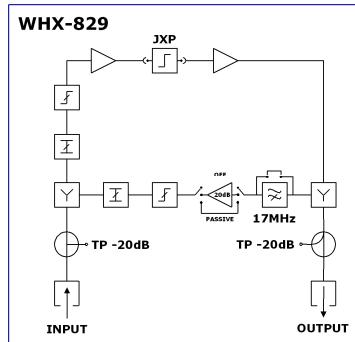

- Output stage amplifier based on GaAs hybrid circuit with Power Doubler configuration
- High output level
- 1 GHz bandwidth
- Easy adjustment
- Switchable return path: passive / off / active.
- Line overvoltage protection
- Local or remote power supply.
- Robust, die-casting aluminum housing.

The **WHX-829** and **WHX-929** amplifiers have been designed for professional multimedia CATV networks which make an intensive use of the return path transmission. GaAs hybrid circuit applied in **WHX-x29** guarantees high quality of signal parameters – high output level with very low inter-modulation distortions. GaAs technology enables reduction of power consumption which has an influence on CATV network maintenance costs. .

WHX amplifier is available in two versions: **WHX-829** with RF adjustment done by built-in potentiometers and **WHX-929** with RF adjustment done by JXP modules.
